

HEATING, VENTILATION, AIR CONDITIONING, & REFRIGERATION TECHNOLOGY

PROGRAM OVERVIEW

2-YEAR PROGRAM

- Electrical/refrigeration fundamentals
- Direct digital controls
- Residential/light commercial systems
- Commercial/industrial refrigeration
- Industrial heating and cooling
- Motor controls
- Variable frequency drives
- Industrial boilers
- Oxyacetylene torches/welding

The WA State Dept. of Labor and Industries may recognize up to one year of training received as time toward the 06A HVAC/R Specialty Electrical License exam.

MUCH OF OUR DAILY LIFE IS SPENT IN A CONTROLLED, INDOOR ENVIRONMENT.

With advances in the HVAC/R industry, we can all stay cool in the summer, warm in the winter, and our food will stay preserved long after we bring it home from the grocery store. The key to these advances lies in the expertise of HVAC/R technicians.

HVAC/R techs install, maintain, and repair the systems that make our environment more functional and comfortable. From replacing motors and thermostats, to performing mechanical and electrical troubleshooting, technicians can be found almost everywhere in the world in nearly every industry.

DON'T SIT IN AN OFFICE - CHOOSE A CAREER THAT WILL KEEP YOU MOVING.

This is an industry that evolves quickly and provides a variety of opportunities from technician positions to design and manufacturing. Technicians work in homes, schools, hospitals, factories, and office buildings. They can also choose to work on airplanes, trucks, and ships.

Keeping people and products at a consistent temperature is no longer enough. The future of the HVAC/R industry is bright as new tools are introduced that focus on ventilation, air quality, remote access systems, and green technologies.
